ID THEFT OVERVIEW

WHAT IS IDENTITY THEFT?

Law enforcement agencies agree that the key to identity theft is the misuse of consumer address and billing information. You see the headlines almost every day. Unsuspecting consumers are being targeted for and victimized by identity theft from every conceivable angle financial institutions, retailers, mail boxes, post offices, the Internet, email, relatives, co-workers and the list keeps growing. You never know when it's going to be your turn. LIFE Prime Plus Membership is designed to minimize your exposure and stop the potential misuse of your Identity information.

A crime more than credit card fraud

When most people think of identity theft, they think about a thief using their credit cards. Although a serious crime, this form of identity theft does not require the long, time-consuming process of the two most serious forms of ID theft known as **Identity Assumption** and **Synthetic Identity Theft**.

The crime of "Identity Assumption" occurs when the thief uses your social security number and your name to commit fraud. The crime of "Synthetic Identity Theft" occurs when the thief uses your social security number and an alias rather than your name to commit fraud. In both cases, the thief either steals or buys a social security number and establishes an address and phone number that you are not aware of. The thief then directs all communication of the fraudulent activity to the address and phone number that the thief controls keeping you unaware of the activity for months or even years.

The longer the thief can prevent you from learning of the fraudulent activity, the more the thief benefits and the more you are harmed.

TYPES OF FRAUD

Financial fraud

Monitoring non-credit card fraud is important. One particular case involved a soldier having his military ID stolen. Thieves used 20 different addresses in 6 states and opened 65 separate accounts. He incurred \$265,000 dollars in damage in four months.

Medical fraud

Stealing your medical identity is one of the fastest growing forms of identity theft. In America, 47 million people don't have adequate medical coverage, which provides a strong incentive for thieves to steal identities. According to the FTC, between 300,000 to 500,000 people have their medical identity stolen annually. Having your identity stolen can max out your health insurance lifetime maximum coverage without you even knowing about it.

When your medical records get altered due to merging with an identity thief's information, it is almost impossible to separate records. Doctors can end up making false diagnoses with faulty data. You could receive the wrong drugs, the incorrect blood type or a diagnosis of mental illness, thus creating life-threatening medical errors.

IRS fraud / employment fraud

There have been instances of identity thieves using or selling social security numbers to defraud the IRS. Victims end up owing thousands of dollars in back taxes to the IRS for an income tax return that wasn't their own.

Thieves gain employment using someone else's social security number. In one case, the victim had her identity used by her former boss who applied for additional credit cards using the employee's social security number. The employee was not aware she was a victim until much later.

False arrest

Having your identity stolen could land you in jail until you can prove that YOU are not the guilty party. The burden is on YOU to prove that you didn't commit a crime.

Child identity fraud

We protect our children from physical harm but now protecting their identity is just as important. It is not uncommon for a child to be victimized at birth from records stolen from the hospital. There is no cost to the thief to "inventory" this personal data, so they can wait months or years before they decide to sell the information or commit the fraud. The child can become an adult before finding out their identity has been stolen.

WHO IS AT RISK?

Identity theft can happen to anyone, a child under the age of 5, an adult, even the dead. Of course the deceased do not have to deal with the problems their loved ones do! The longer the thief can prevent you, the victim, from learning of the fraudulent activity, the more the thief benefits. Meanwhile, harm to the victims continues to grow.

You might already be a victim

The consequences for you and your family can be serious and you can spend years and thousands of dollars getting your identity back. You may not even know your identity has been stolen until it's too late. You can be denied employment or turned down for a loan.

IDENTITY THEFT RISK SCORE

Your identity risk score is derived by searching billions of records where we apply our unique and proprietary analytics to create a risk score between 0-999. The higher your score is, the greater the risk that your identity has been or could become compromised.

The LIFE Prime Plus Membership risk score indicates your level of risk at the time the score is generated. It can change at any time depending upon LIFE Prime Plus Membership detecting new suspicious activity that could indicate the beginning steps of identity theft.

After stealing Social Security numbers, thieves might wait years before attempting to steal someone's identity. That's why continuous monitoring with LIFE Prime Plus Membership is important in protecting your identity.

› How it works

Sign into primeplus.mylifebenefits.org and access the "Personal Information center" to get your current identity theft risk score.

CHILD PROTECT

Did you know that it's not uncommon for children to become identity theft victims from records that were stolen from the hospital when the child was born? Ensure your child's identity hasn't been stolen with Child Protect, an advanced monitoring system that provides enhanced detection of fraudulent use of your child's Social Security number.

› How it works

Sign into primeplus.mylifebenefits.org, access the "Personal Information center" and click on "Child Protect" to see if your child's social security number is at risk before it's too late.

STOP CREDIT CARD OFFERS

Unsolicited credit card offers are an identity theft risk as thieves can take the materials out of your mailbox and open credit cards in your name without your knowledge.

With LIFE Prime Plus Membership, you can request to opt-out of receiving "firm offers" for five years or permanently.

› How it works

Sign into primeplus.mylifebenefits.org, access the "Personal Information center" and go to the "My Plan" page. From there you can follow the link to be removed from pre-approved credit card lists.

LOST WALLET RECOVERY

Losing your purse or wallet can be an upsetting experience, but LIFE Prime Plus Membership's lost wallet service can help make the situation less stressful. Our Fraud Resolution Specialists can assist you by requesting an online credit report to ensure no one has fraudulently used your credit cards, canceling affected credit cards and bank accounts, having new cards issued to you and even placing a fraud alert with the credit reporting agencies; all through the use of multi-party phone calls.

› How it works

If your purse or wallet has been lost or stolen, call the toll-free number listed in your membership materials immediately to limit possible damage.

FREE CREDIT REPORTS REMINDER SERVICE

Credit reports are great tools if used properly. Direct-to-consumer credit reports are available to the general public so consumers can see what lenders, landlords and insurance companies look at prior to making a credit decision. This gives you the opportunity to identify any false information before applying for credit. Additionally, if you become a victim of identity theft, you may want to check your credit reports for any fraudulent activity.

The federal government, in cooperation with the three credit bureaus, put a program in place for every consumer to receive one free credit report per year from each of the three bureaus.

Many consumers choose to stagger receiving their reports from each bureau by choosing 1 report from one bureau, then in another 4 months, choose a report from a 2nd bureau and so forth. They receive a report from one of the credit bureaus every 4 months, equaling a full year of reports.

› How it works

To opt in to this reminder service simply sign into primeplus.mylifebenefits.org, access the "Personal Information center" and go to the "My Profile" page. You will find the opt-in information on the bottom of the "My Profile" page.

ALERTS & ALL-CLEAR MESSAGES

LIFE Prime Plus Membership has people with a real world understanding of what identity theft is and how to minimize its impact on members. Only 1 in 10 identity theft victims were aware that their personal information had been stolen before discovering that they were ID theft victims. By monitoring thousands of databases and millions of records, LIFE Prime Plus Membership is typically able to catch a potential fraudulent activity in its beginning stages.

Databases monitored include:

- Credit bureau information
- Financial institutions
- Cell phone records
- White and yellow pages
- Thousands of others

We use common information including your name, address and phone number to create a data profile that compares your information with our databases. The LIFE Prime Plus Membership system uses proprietary algorithms to look for any unusual or suspicious activity that is different from your profile and could indicate compromises to your identity.

ALERTS BY PHONE

If we find any suspicious activity, we will personally call you using your primary alert phone number.

“ALL CLEAR” EMAIL MESSAGES

If we don't find any suspicious activity, we will send you an “all clear” email notifying you that we have not discovered any suspicious activity in the past 30 days.

› How it works

Sign into primeplus.mylifebenefits.org, access the “Personal Information center” and go to the “My Profile” page to update your phone number and email address.

ACCOUNT ACTIVITY ALERTS - REGISTRATION REQUIRED TO ACTIVATE

In addition to Identity Monitoring and Identity Risk Scores, we can provide you with additional proactive identity theft protection through Account Activity Alerts at no additional cost. These alerts are for transactions that typically take place outside of a credit report and expose you to financial risk. This service is provided to you at no additional cost but you must register for the service using the easy steps listed in the "How To Register" section.

By monitoring participating banks, online retailers, telecom providers, health insurers and more, we look for suspicious activity that could indicate the beginning steps of identity theft. Account Activity Alerts provide unparalleled visibility into your risk of identity misuse, highlighting actions that may indicate someone is establishing a false identity using your information.

Whether a fraudster succeeds or not, we'll let you know when a bank password reset request is made, a new credit card is activated, or access to your health insurance portal is attempted. Our alerts also detect wire transfers through bank or investment accounts, MoneyGram transfers, cell phone insurance use, and address change attempts, whether online or through a financial institution's call center.

When we detect these transactions, you receive an email notification with a phone number included for you to call. If we don't hear from you, we will contact you directly to alert you. Our customer service representatives are available to discuss the alert with you and guide you through the appropriate steps to take if necessary.

› How it Works

Sign into the "Personal Information center" located in the LIFE Prime Plus Membership website and go to the "My Plan" page. From there you can follow the link to "Account Activity Alerts" and click on "My Profile" in the update my profile section.

INTERNET PRIVACY SCANNING

We scan the internet to find your exposed personal information, including phone numbers, birth dates, physical addresses, email addresses, and more. Then we help you remove that data from the websites that posted it online.

Information we monitor

We scan internet directories looking for your address, email address, and phone numbers listed in your account. Examples of the internet directories we scan are:

- Internet directories for existence of monitored information – delete when available
- Monitoring for use of known alternate names
- Monitoring of known criminal websites for illegal trading of personal information.
- National databases for new address information
- Surveillance of unregulated global networks

REMOVAL OF DATA AND OPTING OUT

We help you remove data from websites that post it online. And, once requested, we automatically process opt-outs on your behalf. This stops the people-search sites from selling your personal information to individuals who might have ulterior motives.

Updating your profile

You have the option of adding an additional postal address, two additional email addresses, and two additional phone numbers. To update your current information or list additional addresses and phone numbers you simply:

- Sign into your Personal Information Center
- Click on “My Plan”
- Click on “Internet Privacy Scanning”
- Click on “My Profile” located in the Updating your profile section
- Fill in the blanks for the additional information you would like us to begin monitoring

You can review your history of your internet privacy scans, other alerts, and email notifications within the My History page in the personal information center.

*Resort properties vary.

What's the difference between a LIFE Prime Plus Membership resort vacation vs an ordinary hotel/suite vacation?

- First size: The average hotel room is 325 square feet. Save Big Resort accommodations are typically 1,100 square feet for a 1 bedroom, 1,250 for 2 bedrooms and it goes up from there.
- Safety and security: Hotels have a transient clientele whereas our Resort accommodations by the week do not attract that clientele.
- Privacy: Your home is private – now your vacation accommodations are also private allowing for you to spend quality time with your family or group.
- Extremely Affordable – member only Resort accommodations begin at less than \$10 per person per night
- Amenities* – Most Resort accommodations will feature full kitchens with everything you need including flat screen TV's, bedding, towels, you name it. Enjoy a relaxing hot tub, fireplace, BBQ's or a pool party.

PRIVATE WIFI

Protect your personal information in public WiFi hotspots.

Public WiFi is just that – public.
Private WiFi makes you invisible.

PRIVATE WIFI VPN ENCRYPTION

Given the inherent security risk of public Wi-Fi, and our propensity to use unsecured access to the Internet, VPN encryption is a perfect solution to a serious problem.

Primary benefits include:

- Intelligent activation automatically secures any Wi-Fi connection.
- The only way to protect against hackers in public Wi-Fi is to encrypt all internet communication.
- Essential protection for today's mobile lifestyle.
- Simple, modern and easy to use.
- VPN keeps your personal information safe and secure wherever you are.
- Encryption that works everywhere in the world.
- VPNs cloaks an actual IP address, making it harder for advertisers (or spies, or hackers) to track users online.

THE PROBLEM

Public WiFi networks are not secure

Three out of four people have used public WiFi hotspots in the last twelve months. Yet most don't realize that WiFi signals are just radio waves. Anyone in range can "listen in" to all of the data you send and receive, as easily as tuning to the right station. And antivirus or firewall software can't protect you.

Hotspots are Easy to Hack

Coffee shops. Hotels. Airports. It doesn't matter what kind. No public WiFi hotspot in the world is secure. A report from NBC's TODAY show reveals how easy it is to hack a public hotspot using a normal laptop and simple software. And in a CBS News segment a reporter has her password stolen out of thin air while using a café's free WiFi connection.

Your Private information is exposed

Your usernames, passwords, Facebook account details, and other confidential information can literally be stolen out of thin air. When asked about potential issues with using free public WiFi, 88% surveyed in a 2014 Harris Poll mentioned identity theft – yet 39% still admitted to accessing or transmitting sensitive information over public WiFi despite the risks.

TO ACTIVATE YOUR PRIVATE WIFI

- Sign into primeplus.mylifebenefits.org and follow the link to "Private WiFi"
- Complete the enrollment steps to activate up to 3 devices

For questions regarding the activation of your Private WiFi VPN solution, contact: 877-279-6338 for assistance!

Your actual savings may vary based on multiple factors including the vehicle you select, region, dealer, and applicable vehicle specific manufacturer incentives which are subject to change. The Manufacturer's Suggested Retail Price ("MSRP") is determined by the manufacturer, and may not reflect the price at which vehicles are generally sold in the dealer's trade area as not all vehicles are sold at MSRP. ID THEFT OVERVIEW

WHAT IS IDENTITY THEFT?

Law enforcement agencies agree that the key to identity theft is the misuse of consumer address and billing information. You see the headlines almost every day. Unsuspecting consumers are being targeted for and victimized by identity theft from every conceivable angle financial institutions, retailers, mail boxes, post offices, the Internet, email, relatives, co-workers and the list keeps growing. You never know when it's going to be your turn. LIFE Prime Plus Membership is designed to minimize your exposure and stop the potential misuse of your Identity information.

A crime more than credit card fraud

When most people think of identity theft, they think about a thief using their credit cards. Although a serious crime, this form of identity theft does not require the long, time-consuming process of the two most serious forms of ID theft known as **Identity Assumption** and **Synthetic Identity Theft**.

The crime of "Identity Assumption" occurs when the thief uses your social security number and your name to commit fraud. The crime of "Synthetic Identity Theft" occurs when the thief uses your social security number and an alias rather than your name to commit fraud. In both cases, the thief either steals or buys a social security number and establishes an address and phone number that you are not aware of. The thief then directs all communication of the fraudulent activity to the address and phone number that the thief controls keeping you unaware of the activity for months or even years.

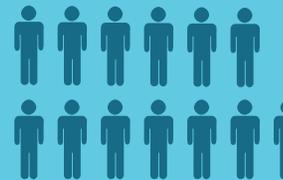

The longer the thief can prevent you from learning of the fraudulent activity, the more the thief benefits and the more you are harmed.

WHO IS AT RISK?

Identity theft can happen to anyone, a child under the age of 5, an adult, even the dead. Of course the deceased do not have to deal with the problems their loved ones do! The longer the thief can prevent you, the victim, from learning of the fraudulent activity, the more the thief benefits. Meanwhile, harm to the victims continues to grow.

You might already be a victim

The consequences for you and your family can be serious and you can spend years and thousands of dollars getting your identity back. You may not even know your identity has been stolen until it's too late. You can be denied employment or turned down for a loan.

TYPES OF FRAUD

Financial fraud

Monitoring non-credit card fraud is important. One particular case involved a soldier having his military ID stolen. Thieves used 20 different addresses in 6 states and opened 65 separate accounts. He incurred \$265,000 dollars in damage in four months.

Medical fraud

Stealing your medical identity is one of the fastest growing forms of identity theft. In America, 47 million people don't have adequate medical coverage, which provides a strong incentive for thieves to steal identities. According to the FTC, between 300,000 to 500,000 people have their medical identity stolen annually. Having your identity stolen can max out your health insurance lifetime maximum coverage without you even knowing about it.

When your medical records get altered due to merging with an identity thief's information, it is almost impossible to separate records. Doctors can end up making false diagnoses with faulty data. You could receive the wrong drugs, the incorrect blood type or a diagnosis of mental illness, thus creating life-threatening medical errors.

IRS fraud / employment fraud

There have been instances of identity thieves using or selling social security numbers to defraud the IRS. Victims end up owing thousands of dollars in back taxes to the IRS for an income tax return that wasn't their own.

Thieves gain employment using someone else's social security number. In one case, the victim had her identity used by her former boss who applied for additional credit cards using the employee's social security number. The employee was not aware she was a victim until much later.

False arrest

Having your identity stolen could land you in jail until you can prove that YOU are not the guilty party. The burden is on YOU to prove that you didn't commit a crime.

Child identity fraud

We protect our children from physical harm but now protecting their identity is just as important. It is not uncommon for a child to be victimized at birth from records stolen from the hospital. There is no cost to the thief to "inventory" this personal data, so they can wait months or years before they decide to sell the information or commit the fraud. The child can become an adult before finding out their identity has been stolen.

RISK SCORE

Your identity risk score is derived by searching billions of records where we apply our unique and proprietary analytics to create a risk score between 0-999. The higher your score is, the greater the risk that your identity has been or could become compromised.

The LIFE Prime Plus Membership risk score indicates your level of risk at the time the score is generated. It can change at any time depending upon LIFE Prime Plus Membership detecting new suspicious activity that could indicate the beginning steps of identity theft.

After stealing Social Security numbers, thieves might wait years before attempting to steal someone's identity. That's why continuous monitoring with LIFE Prime Plus Membership is important in protecting your identity.

CHILD PROTECT

Did you know that it's not uncommon for children to become identity theft victims from records that were stolen from the hospital when the child was born? Ensure your child's identity hasn't been stolen with Child Protect, an advanced monitoring system that provides enhanced detection of fraudulent use of your child's Social Security number.

TOP CREDIT CARD OFFERS

Unsolicited credit card offers are an identity theft risk as thieves can take the materials out of your mailbox and open credit cards in your name without your knowledge.

With LIFE Prime Plus Membership, you can request to opt-out of receiving "firm offers" for five years or permanently.

LOST WALLET RECOVERY

Losing your purse or wallet can be an upsetting experience, but LIFE Prime Plus Membership's lost wallet service can help make the situation less stressful. Our Fraud Resolution Specialists can assist you by requesting an online credit report to ensure no one has fraudulently used your credit cards, canceling affected credit cards and bank accounts, having new cards issued to you and even placing a fraud alert with the credit reporting agencies; all through the use of multi-party phone calls.

FREE CREDIT REPORTS REMINDER SERVICE

Credit reports are great tools if used properly. Direct-to-consumer credit reports are available to the general public so consumers can see what lenders, landlords and insurance companies look at prior to making a credit decision. This gives you the opportunity to identify any false information before applying for credit. Additionally, if you become a victim of identity theft, you may want to check your credit reports for any fraudulent activity.

The federal government, in cooperation with the three credit bureaus, put a program in place for every consumer to receive one free credit report per year from each of the three bureaus.

Many consumers choose to stagger receiving their reports from each bureau by choosing 1 report from one bureau, then in another 4 months, choose a report from a 2nd bureau and so forth. They receive a report from one of the credit bureaus every 4 months, equaling a full year of reports.

ALERTS & ALL-CLEAR MESSAGES

LIFE Prime Plus Membership has people with a real world understanding of what identity theft is and how to minimize its impact on members. Only 1 in 10 identity theft victims were aware that their personal information had been stolen before discovering that they were ID theft victims. By monitoring thousands of databases and millions of records, LIFE Prime Plus Membership is typically able to catch a potential fraudulent activity in its beginning stages.

Databases monitored include:

- Credit bureau information
- Financial institutions
- Cell phone records
- White and yellow pages
- Thousands of others

We use common information including your name, address and phone number to create a data profile that compares your information with our databases. The LIFE Prime Plus Membership system uses proprietary algorithms to look for any unusual or suspicious activity that is different from your profile and could indicate compromises to your identity.

ALERTS BY PHONE

If we find any suspicious activity, we will personally call you using your primary alert phone number.

“ALL CLEAR” EMAIL MESSAGES

If we don't find any suspicious activity, we will send you an “all clear” email notifying you that we have not discovered any suspicious activity in the past 30 days.

ACCOUNT ACTIVITY ALERTS - REGISTRATION REQUIRED TO ACTIVATE

In addition to Identity Monitoring and Identity Risk Scores, we can provide you with additional proactive identity theft protection through Account Activity Alerts at no additional cost. These alerts are for transactions that typically take place outside of a credit report and expose you to financial risk. This service is provided to you at no additional cost but you must register for the service using the easy steps listed in the "How To Register" section.

By monitoring participating banks, online retailers, telecom providers, health insurers and more, we look for suspicious activity that could indicate the beginning steps of identity theft. Account Activity Alerts provide unparalleled visibility into your risk of identity misuse, highlighting actions that may indicate someone is establishing a false identity using your information.

Whether a fraudster succeeds or not, we'll let you know when a bank password reset request is made, a new credit card is activated, or access to your health insurance portal is attempted. Our alerts also detect wire transfers through bank or investment accounts, MoneyGram transfers, cell phone insurance use, and address change attempts, whether online or through a financial institution's call center.

When we detect these transactions, you receive an email notification with a phone number included for you to call. If we don't hear from you, we will contact you directly to alert you. Our customer service representatives are available to discuss the alert with you and guide you through the appropriate steps to take if necessary.

INTERNET PRIVACY SCANNING

We scan the internet to find your exposed personal information, including phone numbers, birth dates, physical addresses, email addresses, and more. Then we help you remove that data from the websites that posted it online.

Information we monitor

We scan internet directories looking for your address, email address, and phone numbers listed in your account. Examples of the internet directories we scan are:

- Internet directories for existence of monitored information – delete when available
- Monitoring for use of known alternate names
- Monitoring of known criminal websites for illegal trading of personal information.
- National databases for new address information
- Surveillance of unregulated global networks

REMOVAL OF DATA AND OPTING OUT

We help you remove data from websites that post it online. And, once requested, we automatically process opt-outs on your behalf. This stops the people-search sites from selling your personal information to individuals who might have ulterior motives.

Updating your profile

You have the option of adding an additional postal address, two additional email addresses, and two additional phone numbers. To update your current information or list additional addresses and phone numbers you simply:

- Sign into your Personal Information Center
- Click on “My Plan”
- Click on “Internet Privacy Scanning”
- Click on “My Profile” located in the Updating your profile section
- Fill in the blanks for the additional information you would like us to begin monitoring

You can review your history of your internet privacy scans, other alerts, and email notifications within the My History page in the personal information center.

PRIVATE WIFI

Protect your personal information in public WiFi hotspots.

Public WiFi is just that – public.
Private WiFi makes you invisible.

PRIVATE WIFI VPN ENCRYPTION

Given the inherent security risk of public Wi-Fi, and our propensity to use unsecured access to the Internet, VPN encryption is a perfect solution to a serious problem.

Primary benefits include:

- Intelligent activation automatically secures any Wi-Fi connection.
- The only way to protect against hackers in public Wi-Fi is to encrypt all internet communication.
- Essential protection for today's mobile lifestyle.
- Simple, modern and easy to use.
- VPN keeps your personal information safe and secure wherever you are.
- Encryption that works everywhere in the world.
- VPNs cloaks an actual IP address, making it harder for advertisers (or spies, or hackers) to track users online.

THE PROBLEM

Public WiFi networks are not secure

Three out of four people have used public WiFi hotspots in the last twelve months. Yet most don't realize that WiFi signals are just radio waves. Anyone in range can "listen in" to all of the data you send and receive, as easily as tuning to the right station. And antivirus or firewall software can't protect you.

Hotspots are Easy to Hack

Coffee shops. Hotels. Airports. It doesn't matter what kind. No public WiFi hotspot in the world is secure. A report from NBC's TODAY show reveals how easy it is to hack a public hotspot using a normal laptop and simple software. And in a CBS News segment a reporter has her password stolen out of thin air while using a café's free WiFi connection.

Your Private information is exposed

Your usernames, passwords, Facebook account details, and other confidential information can literally be stolen out of thin air. When asked about potential issues with using free public WiFi, 88% surveyed in a 2014 Harris Poll mentioned identity theft – yet 39% still admitted to accessing or transmitting sensitive information over public WiFi despite the risks.
